25X1

1.   Comment. As compared with the last reported period, eastbound traffic through Scheune, Kuestrin and Guben and traffic through Frankfurt/Oder in both directions increased slightly, while traffic through Horka decreased. Westbound traffic through Forst rose, whereas eastbound traffic through that border station dropped. In the present report,   the numbers of loaded and empty cars and not the numbers of trains passing through the border stations. This change of procedure is immaterial for the assessment of the volume of traffic through the border stations mentioned.
